"WE DELIVER ON OUR PROMISE"

Hi again from the McKeown Team,  
We have a couple of items of business for you this month – Issue 2.....

**Regarding our 24/7 network**, we now have a new dual high flow diesel pump on at Clinton, a new petrol pump and we are in the process of putting in an extra lane. We have also put new pumps in at Kingston and the old pumps that have gotten us by until now have been retired to the scrap heap.

Gore is going great and thanks to all you customers that now use the site, thank you for the fantastic feedback and support.

To find out more about our network go to [www.mckeown.co.nz](http://www.mckeown.co.nz) or phone us on 0800 800 908

## TECH TALK - ENGINE COOLANT ISN'T JUST ANTIFREEZE

### THE COLD FACTS:

40% of all engine problems are directly or indirectly related to improper cooling system maintenance.

Cheap coolant/antifreezes may stop your engine from freezing but they probably won't do all the other jobs a coolant is required to do like:

- Unrestricted heat transfer
- Long term corrosion protection of all metal parts, especially aluminium
- Prevents wet liner cavitation erosion
- Prevent/minimise water pump seal failures
- Eliminate the requirement for supplementary coolant additives

Cheap coolant/antifreezes normally have to be replaced every year to maintain any semblance of usefulness.

And lastly let's talk about the dollars because cheap purchase prices (forgetting about the maintenance costs associated to cheap) often works out far more expensive in the long run so don't be fooled. remember cheap is 1 years life versus our Caltex Engine Coolant which is a top quality product and guaranteed in service for a lot longer.

### CHECK THIS OUT:

Caltex Engine Coolant in:

- Passenger cars and light commercial vehicles  
= 250,000 kms or 5 years in service.
- Heavy duty on road diesel vehicles  
= 600,000 kms or 4 years in service.
- Heavy duty diesel off road equipment  
= 8,000 hours or 4 years

### TRUE COSTS SO ASK YOURSELF:

- ✓ Cheap product = \$6.12 per litre and lasts 1 year\* = \$6.12 per litre per annum
- ✓ McKeown product = \$7.00 per litre and lasts 5 years = \$1.40 per litre per annum
- ✓ McKeown product = \$7.00 per litre and lasts 4 years = \$1.75 per litre per annum

**Remember** . this does not include the annual labour & inconvenience cost to change the the cheap product every year versus every 4-5 years for McKeown's coolant.

**Odometer and hubometer recordings** are now available at all of our McKeown CardFuel 24/7 sites. Each time you stop from now on you will be prompted to ask if you wish to use the service and all you need do is Yes or No. If you wish to use this feature and you also use Caltex Diesel Stops with your card then you will need to let us know so we can make some changes.

To find out more about this feature phone Stuart on 0800 800 908

**Gypsy Day - Are you moving** because if you are, your sharemilker is or you have a new sharemilker arriving we would really appreciate hearing from you as the information helps us enormously to be able to assist you in effecting a seamless transfer of delivery information as well as to talk early to new sharemilkers coming into the area to help them to settle in more quickly with one less supplier headache.

We would appreciate hearing from you and you can call us toll free on 0800 800 908 or email us on [sales@mckeown.co.nz](mailto:sales@mckeown.co.nz)

When you last bought petrol, 59.129 cents per litre was collected by the government as fuel excise (excluding GST), which is made up of:

- 48.524 cents - National Land Transport Fund
- 9.90 cents - ACC Motor Vehicle Account
- 0.66 cents - Local Authorities Fuel Tax
- 0.045 cents - Petroleum or Engine Fuels Monitoring Levy

In addition, GST is collected on the overall price of fuel including excise. The GST on excise amounts to a 7.7 cents per litre "tax on taxes". There are no taxes on diesel other than GST. Instead, diesel vehicles pay [Road User Charges](#). All fuels also pay an Emissions Trading Scheme charge (approximately 3 cents per litre).
