

## APPLICATION SUMMARY

---

<b>Application code:</b>	HRC07001
<b>Application category:</b>	To reassess a hazardous substance under section 63A of the Hazardous Substances and New Organisms (HSNO) Act 1996
<b>Applicant:</b>	ERMA New Zealand P O Box 131 Wellington 6015
<b>Purpose:</b>	To vary the approved handler control where petrol, in quantities less than 2,000 litres, is stored on a farm of 4 hectares or more.
<b>Date application received:</b>	28 March 2007
<b>ERMA New Zealand contact:</b>	Noel McCardle

---

The reassessment is confined to the approved handler control for petrol. It is proposed that an approved handler is not required where petrol, in quantities less than 2,000 litres, is stored on a farm of 4 hectares or more. The person handling the petrol must, however, be trained in the hazards associated with the substance and its safe use and handling, including steps to be taken in the event of spillage or other emergency.
